

CMS synthetic claims - not real patient or provider performance.

Executive summary

Data: CMS DE-SynPUF sample 1, retrieved per data/data\_manifest.json. Definitions: see Metric\_Dictionary. Rates are formulas; the Pipeline columns hold the warehouse values they must equal.

| Year | Beneficiaries | Member years | Claims    | Paid amount    | Admissions | ED proxy visits | Readmission eligible | Readmission events | Top 5% paid amount |
|------|---------------|--------------|-----------|----------------|------------|-----------------|----------------------|--------------------|--------------------|
| 2008 | 116,352       | 107,296.8    | 2,025,978 | 483,275,670.00 | 26,262     | 22,494          | 25,861               | 3,906              | 234,226,340.00     |
| 2009 | 114,538       | 106,352.2    | 2,210,561 | 504,801,500.00 | 24,710     | 26,334          | 24,763               | 1,866              | 197,944,970.00     |
| 2010 | 112,754       | 104,407.4    | 1,350,500 | 286,712,060.00 | 13,387     | 13,753          | 13,421               | 577                | 123,536,500.00     |

Limitations

What this workbook is: an operations review of CMS DE-SynPUF synthetic Medicare claims. It demonstrates a pipeline; it does not describe real Medicare.

Not included: prescription drug events; any beneficiary-level rows; any claim of savings, fraud, or provider quality.

Utilization risk tier is a transparent descriptive stratification, not CMS-HCC or any official risk adjustment.

The 30-day readmission proxy is measure-inspired, not a certified measure. 2010 volumes are lower in the source, so year-to-year trends are not interpretable.

| Year<br>(rates) | Pipeline<br>admissions<br>per 1000 | Pipeline<br>readmission<br>proxy | Pipeline top<br>5% share | Paid per<br>beneficiary | Admissions<br>per 1000<br>member years | ED proxy per<br>1000 member<br>years | Readmission<br>proxy | Top 5%<br>payment share | Check vs<br>pipeline |
|-----------------|------------------------------------|----------------------------------|--------------------------|-------------------------|----------------------------------------|--------------------------------------|----------------------|-------------------------|----------------------|
| 2008            | 244.8                              | 15.1%                            | 48.5%                    | 4,153.57                | 244.8                                  | 209.6                                | 15.1%                | 48.5%                   | OK                   |
| 2009            | 232.3                              | 7.5%                             | 39.2%                    | 4,407.28                | 232.3                                  | 247.6                                | 7.5%                 | 39.2%                   | OK                   |
